

Docket # E-00000XX-13-0214

Dear Corporation Commissioners,

I am an APS customer and a participant in the APS Home Energy Checkup program. This program was instrumental in enabling me to understand some of the improvements I could implement at my home to make it more energy efficient. Further, the team that conducted the efficiency audit was first class. This program and the available energy efficiency rebates have allowed me to have affordable access to energy efficiency improvements on my home that I might not have been able to pursue without the rebates.

As a rate payer I would like to encourage you to support the Energy Efficiency Standard that has been instrumental to creating and implementing these energy efficiency programs. Ending these programs would have a detrimental affect to our states sustainable future, job growth and energy independence. Please keep these valuable programs around for future rate payers like myself.

Sincerely,

Chuck Bruni
